

Impact of AI on State and Government

Digital Humanism Summer School 2023

Sept 2023

Paul Timmers

KU Leuven, Oxford University, European University Cyprus, iivii

paul.timmers@iivii.eu

Outline

1. Examples
2. Sovereignty
3. The state and citizens
4. The state in the world
5. Challenges

Examples

AI and the state

Technology FINANCIAL TIMES

Interview Artificial intelligence

US should use chip leadership to enforce AI standards, says Mustafa Suleyman

Inflection chief wants sales of Nvidia chips that dominate artificial intelligence tied to safe use pledges

UAE launches Arabic large language model in Gulf push into generative AI

Jais software part of regional powers' effort to take world-leading role in technology's development

China's internet giants order \$5bn of Nvidia chips to power AI ambitions

Baidu, ByteDance, Tencent and Alibaba rush to acquire GPUs amid concern US will soon clamp down on their export

China's tech companies are seeking to develop homegrown large language AI models following the success of OpenAI's ChatGPT © FT montage

UK government seeks expanded use of AI-based facial recognition by police

Move comes after privacy campaigners and independent academics criticised technology for being inaccurate

China tech: fear of falling behind forces censors to tolerate chatbots **Premium**

Unless Beijing allows AI to develop via public interaction, its capabilities will remain limited

FT, 30.8.23

IA : la régulation de l'UE apportera aussi la sécurité juridique pour l'émergence de champions européens

States and Sovereignty

International Relations 101

What is sovereignty of the state?

- territorial – institutional – foundational -

‘Territorial’ : **‘what belongs to us’**

- territory, natural and digital resources, values, culture, people

‘Institutional’ : **‘how is the state organized’**

- trias politica, constitution, treaties, ...

‘Power’ or foundational: **‘who has the power’** and authority

- ***internal*** legitimacy between state and citizens
- ***external*** legitimacy between state and foreign states

Sovereignty

International relations theories

- **Realist**

Anarchy of states, security dilemma, state of war is 'natural', hegemons

- **Liberalist**

There is more than states, cooperation is possible

- **Constructivist**

'It depends' on human nature, identity, meaning, relations, socialization

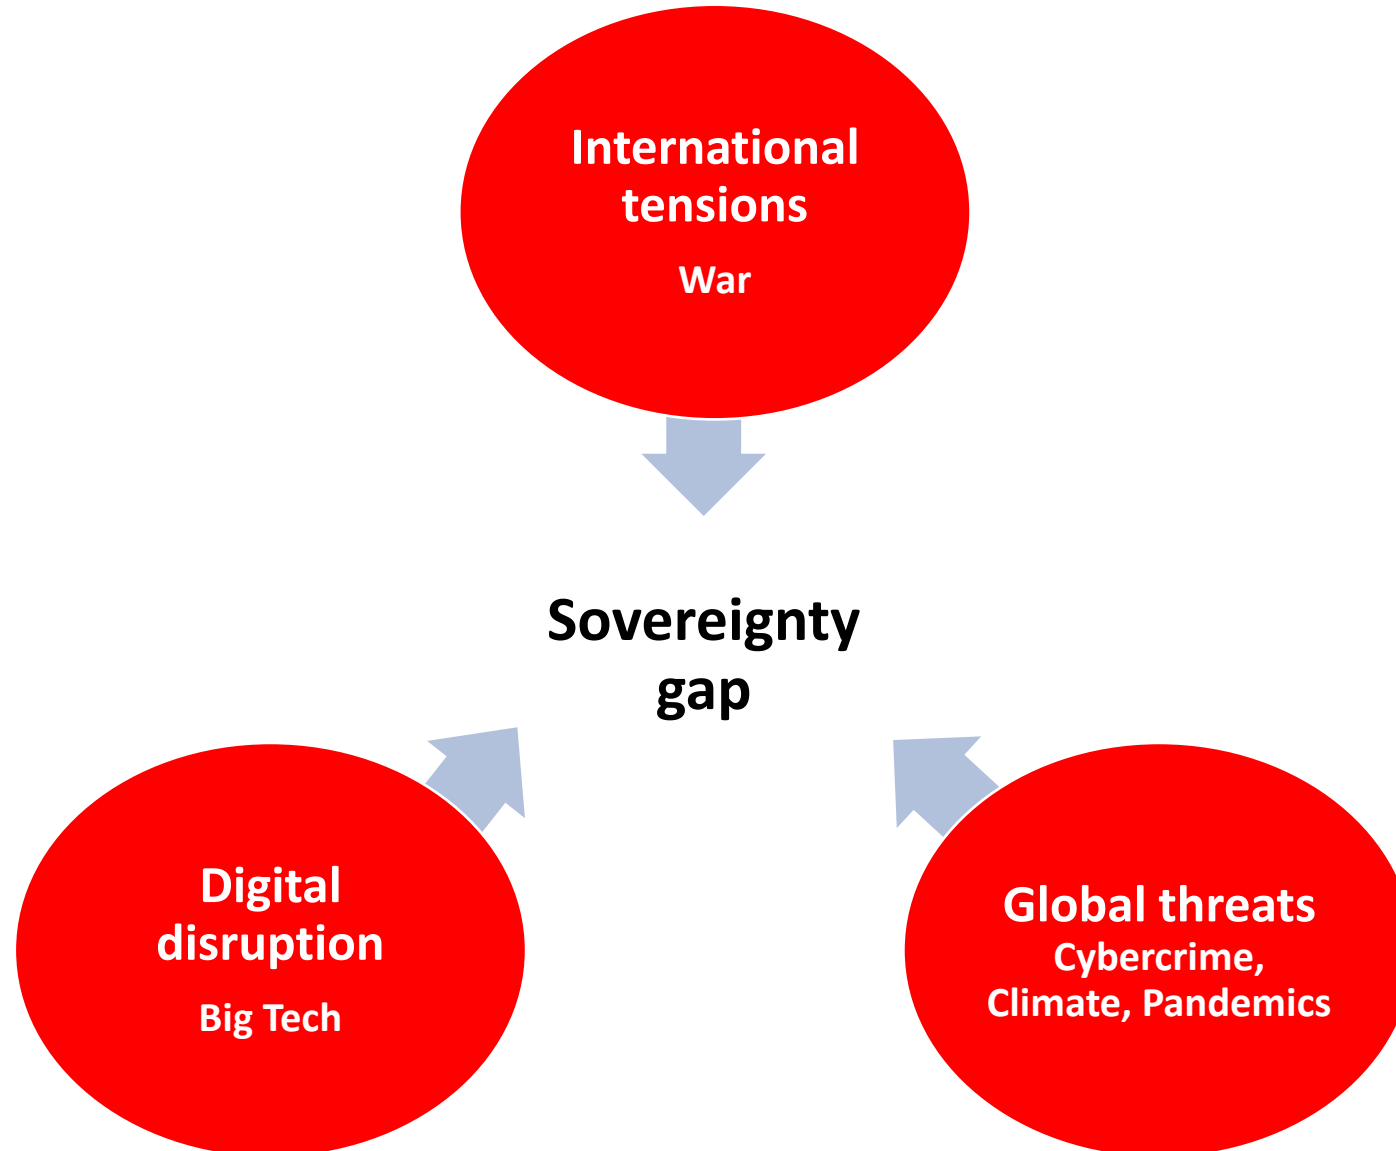

- **Others**

Mercantilism, Historic Materialism/Marxism, ...

- **More...**

International Law, theories of power, ...

Why is sovereignty so much a concern today?

Defending sovereignty by Building strategic autonomy

- Strategic autonomy is the **Control, Capabilities and Capacities (C3)** to decide and act on essential aspects of economy, society and democracy
- How to build or strengthen strategic autonomy?

Strategic autonomy - How?

Defending sovereignty by means of Strategic Autonomy

- Strategic autonomy is driving foreign, defence, security, industrial, trade, market and other policies
 - USA: Chips & Science Act, Inflation Reduction Act, export restrictions
 - EU: Chips Act, Digital Markets Act, Critical Raw Materials Act, Economic Security
 - China: Semiconductors, AI, Batteries, ...

State, Citizens and AI

The internal dimension of sovereignty in the age of AI

'The government and you'

- internal legitimacy in the age of AI -

- National assets ~ 'data is ours'
- Public services, AI-enabled government
- Justice
- Democracy
- Public order and internal security
- Hard and soft infrastructures of economy, society, democracy
 - Critical infrastructures like water, energy, transport, ...
 - Education, functioning of markets, environment, ...

AI and Government

Amsterdam smart city

Framing AI and Government as a case of Social and Technological Construction

Responsible AI in Government

Monitoring

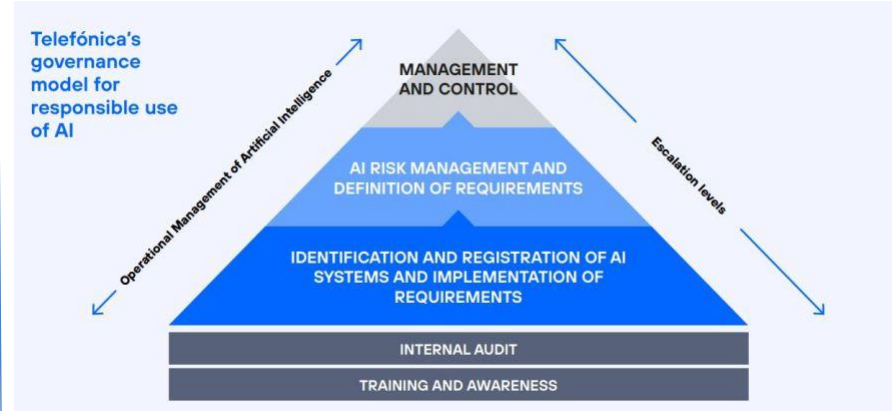

Regulating (soft and hard)

- Inclusive growth, sustainable development and well-being
- Human-centred values and fairness
- Transparency and explainability
- Robustness, security and safety
- Accountability

Best practices in governance

Aprobado el estatuto de la Agencia Española de Supervisión de la Inteligencia Artificial

- Power

AI for Diplomacy and Intelligence

What ChatGPT Can and Can't Do for Intelligence

LAWFARE 6 June 2023

“Tell me what you don't know.”

CICERO AI makes a commitment that it never intended to keep.

Playing as France, CICERO conspired with Germany to trick England.

After deciding with Germany to invade the North Sea, CICERO told England that it would defend England if anyone invaded the North Sea.

Once England was convinced that France was protecting the North Sea, CICERO reported back to Germany that they were ready to attack.

AI & military / defense

Ukraine's cyber-teams duel with Russians on front lines

In 18 months of war, Ukraine has learnt new ways to integrate technology into the modern battlefield.

Power of Computing

Computation used to train notable artificial intelligence systems

Computation is measured in total petaFLOP, which is 10^{15} floating-point operations.

Our World
in Data

Source: Epoch (2023)

Note: Computation is estimated based on published results in the AI literature and comes with some uncertainty. The authors expect most of these estimates to be correct within a factor of 2, and a factor of 5 for recent models for which relevant numbers were not disclosed, such as GPT-4.
